SMART HOSPITALITY

Make **SMART**
your accomodation

The revolution for accommodations

An integrated, modular and affordable system.

Mahosy is the system that revolutionizes the hospitality industry through its innovative vision and approach to both guest management and operational management of any accommodation facility: , hotel, B&B, residence, vacation home, ...

Mahosy is based on the concept of modularity, which can be “custom configured” according to the size and investment and management needs of the accommodation facility.

Mahosy is adaptable to the individual facility, best preserving what already exists in terms of systems. In fact, it has a great ability to integrate with PMS software as well as with the most widely used air conditioning brands on the market.

Mahosy improves guest satisfaction, optimizes asset management, enables home automation management of the facility, and reduces operating costs.

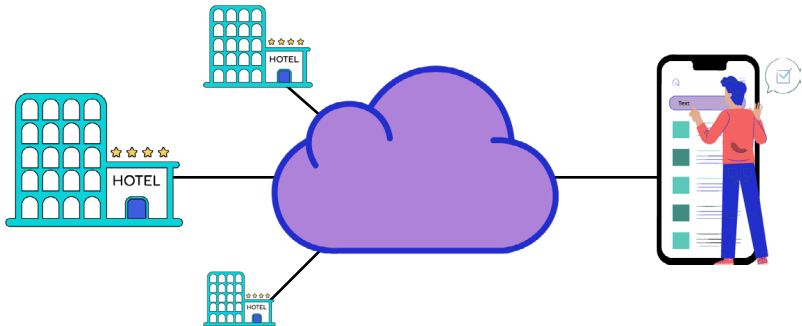

A powerful Cloud

Reliable, versatile, unlimited.

Managing your software and facilities through Cloud platforms increases the reliability and interoperability of strategies.

With **Mahosy** you can simultaneously manage multiple geographically dispersed accommodations from a single software, or from the comfort of your Smartphone wherever you are.

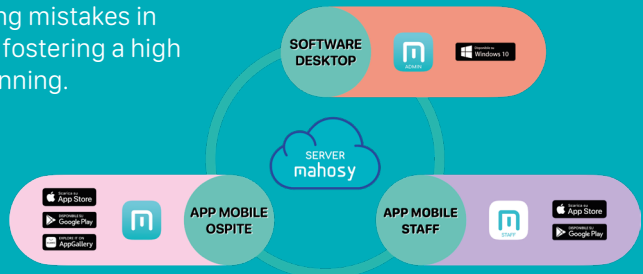

everyone has their own role

The Benefits of Diversified Profiling

One of **Mahosy's** strengths is the integrated management of an accommodation facility by guests, management, and the staff working within it.

This ensures continuous, real-time communication between the parties, which results in an optimization of operations, thus increasing the efficiency of the facility itself. Diversified profiling produces a virtual organization chart of the facility that ensures that each operator acts within the tasks and timeframes he or she has been assigned, reducing the possibility of making mistakes in the workplace and fostering a high degree of work planning.

Mahosy Software: the command center

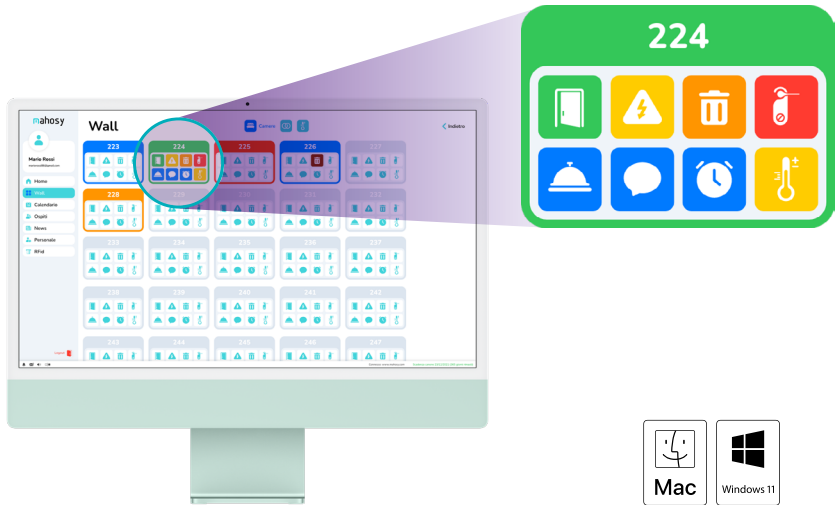

Clear, simple and fast management!

MAHOSY SOFTWARE represents a remote and centralized management, supervision and control dashboard of rooms, including geographically dispersed ones.

Guest Management: reservation management, check-in and check-out, access control, service management, communications, info and activities.

Automations Management: facility management, access control, services, maintenance.

Staff management: activity scheduling, maintenance interventions, room equipment management, communication with staff and guest.

Manage
Staff

Mahosy software can recognize different types of accounts, assigned by task. All in a synergistic and synchronized manner.

The home section includes a series of panels where you can configure activations and upload a range of information that you can synchronize with mobile APPs.

From the main panel, an account can manage all its **Mahosy** facilities.

The wall, in block and list versions, provides an overview of everything that is happening in each room and allows you to manage communications with the

guest.
Mahosy Software is available for Windows and macOS.

Hotel Mahosy

Via A. Di Gasperi 150, 73030 Torre del Greco

+39 0835932020

Automations during stays.

Comfort, Functionality, Savings.

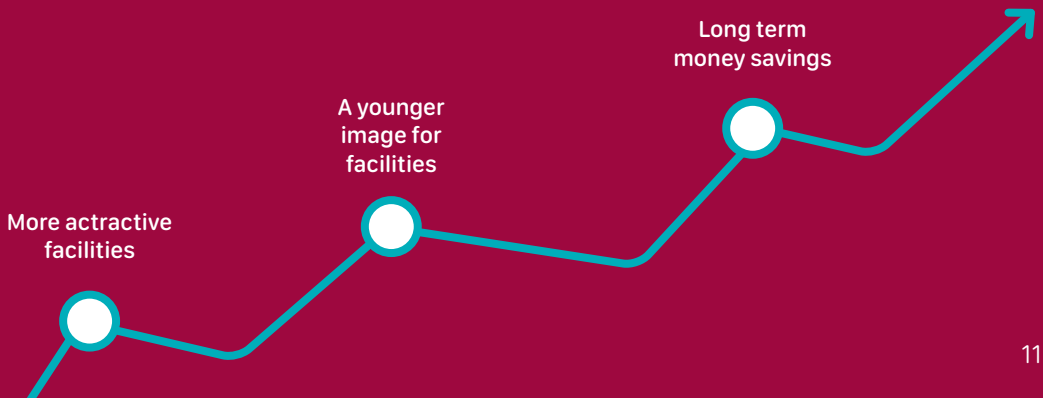

Smart rooms are set to be increasingly present. All it takes is a few taps on the smartphone to open the door, adjust lights and temperature, and run customized scenarios.

Mahosy enables centralized home automation management,

through Hardware and Software components, both of the single room and of complex and different structures, even in a diffuse hotel logic.

The term Home Automation refers to an integrated system of

devices capable of performing autonomous or user-programmed functions, such that the building becomes intelligent.

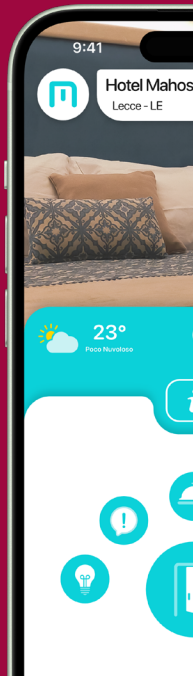

Guests have the Control!

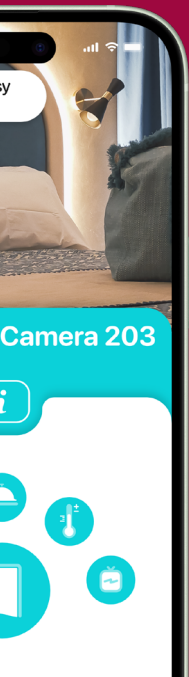

Instantly after the Check-in, guests are able to manage all devices in the room from their Smartphone in a smart and secure way for the facility.

Indeed, activations can be enabled based on the geolocation of the guest to avoid unnecessary activations. In addition, through the centralized management offered by

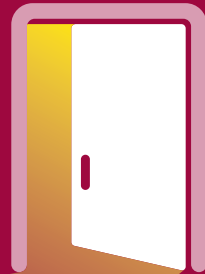

Mahosy software it is possible to create welcome scenarios for guests.

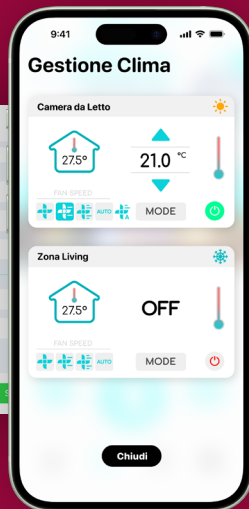

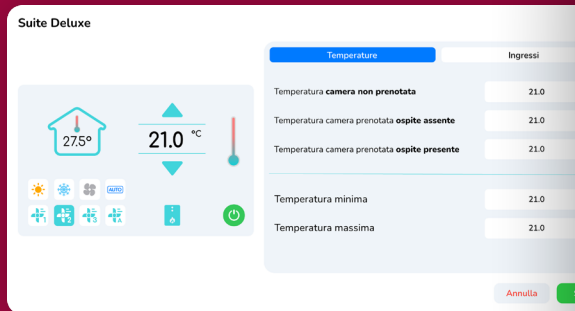

- **Open Doors**
- **Stream Music**
- **Manage Climate**
- **Manage Lights**

Manage Climate

Maximum Comfort, Minimum Waste.

Mahosy allows the climate management of any hospitality facility, even with existing systems, in a comprehensive and intelligent way.

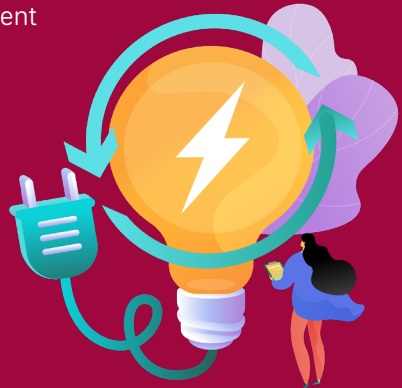

Configuration is done from the desktop software, which operates through an algorithm to create different scenarios based on the various states of the camera.

in addition, guests can be enabled to autonomously and remotely manage the temperature of their room, so that a high degree of comfort can be guaranteed at all times. But autonomous is not uncontrolled! in fact, the algorithm that manages the climate is waste-conscious and manages the status of air counter devices with a view to saving energy.

Energy Saving

Hospitality facilities are an active part of the global energy waste reduction program through more energy-efficient facilities and guests with energy-efficient behaviors.

In this view, **Mahosy** leads to economic benefits already in the short term and helps eliminate unnecessary CO2 emissions into the environment.

A vacation within App's reach

Superior Guest Experience

Mahosy “puts in the hands of the guest” the management of their stay.

With the **MAHOSY APP**, the guest can: self check-in and check out, access the room with one click, manage room facilities, book services and activities in and out of the facility, and have a direct line to the staff for service requests and assistance.

Guest APP

DESIGNED AND DEDICATED TO
THE GUEST, MAKES THEIR STAY
UNIQUE AT ALL TIMES.

Downloadable for free from the
Apple Store and **GooglePlay**,
the **MAHOSY APP** makes guests
of any accommodation free to
manage their stay directly from a
smartphone or tablet.

It all starts with Self Check-in

Ideal for a Totally Contactless Stay

Self check-in is one of the functions that makes **Mahosy** unique. Conveniently and securely, it makes the guest totally autonomous by avoiding unnecessary shifts and queues at the front desk.

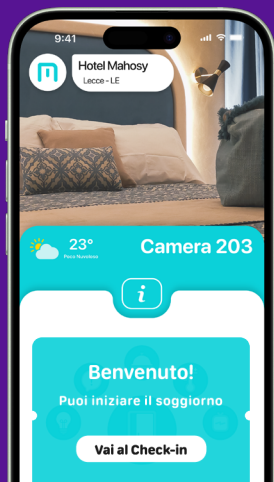

The function is directly related to the management of permissions on documents that the guest has granted at the time of booking. The facility consequently will be able to enable the latter for self check-in.

Thanks to Self Check-in Mahosy allows your guests to enter in the facility on their own. But you can choose the distance in which they can do it

The system has two different modes that enable the guest to self check-in according to the operator's needs: by hooking into the facility's **Wi-Fi** or by **geolocation**.

Guests can securely manage the Check-in and their first access, only after their devices will be connected to the facility's Wi-Fi

Self check-in is possible on the day of the start of the stay within a time range set by the accommodation facility.

Room Code

A unique 6-character alphanumeric code that guests will have at their disposal for the duration of their stay. It will allow them to access the App without the need to create an account.

A 5 stars Service

Guests in charge of their stay.

Mahosy will accompany guests everywhere with an integrated COMMUNICATION system with staff throughout the facility.

Through push notifications and a dedicated internal chat, guests will receive the facility's service information at any time and at the same time can send requests such as breakfast in the room, clean towels, etc., even if they are at the beach or outside the facility.

The **MAHOSY STAFF APP** enables the manager of any hospitality facility to coordinate all operational activities in a highly innovative and centralized manner.

The **MAHOSY STAFF APP** represents a simple, intuitive and real-time communication system between manager, guest and facility staff.

The **MAHOSY STAFF APP** makes “at your fingertips” the organization and management of all services and requests related to the accommodation facility.

All-in-One Management

More than a traditional hotel management system, **Mahosy** integrates Guest Management, Home Automation Facility Management and Asset Management into a single software platform and APP, with a view to improving customer satisfaction, optimizing management costs, energy savings and greater organizational efficiency of staff and activities.

Technology

Mahosy adopts proprietary Cloud Technology, which ensures system reliability and efficiency, as well as security and scalability of management solutions that each facility can choose. Each system component is capable of operating in stand-alone mode or in connection with other MAHOSY components, locally or on a LAN network, offering different combinations and functionalities that can be implemented over time and space.

Comfort, Functionality, Savings.

Mahosy devices are designed to provide guests with maximum comfort and service during their stay, in a simple and intuitive way, without neglecting the aesthetics of the facility. Constant monitoring both from the front desk via Mahosy software, and remotely via **Mahosy App**, allows you to check the state of the art of rooms, facilities, reservations, as well as guest requests at any time, allowing you to intervene promptly to reduce possible inefficiencies, optimize consumption and costs. This means a more satisfied customer, a more efficient facility, lower operating expenses.
